The Ratings are primarily constrained by the modest scale of operations of AD Textiles and its weak financial risk profile marked by fluctuating profit margins, moderately high leverage, and exposure to Forex risks and stressed liquidity position.

The rating also factors in the closely held family business nature of AD Textiles, its concentration risk via customers and suppliers, the highly fragmented nature of the textile industry it operates in and the poor power supply situation in Tamil Nadu.

The ratings, however, favourably take into account the vast experience of the promoters and established operations of the firm.

The sales revenue increased by 23.68 percent from ₹14.41 Crs to ₹17.83 Crs on account of higher volume. The inventory turnover during FY12 was 3.64 times and thereby the inventory days were high at 100 days. This is because the inventory conversion process takes about 100-120 days.
