Rating Reaffirmed

Rationale/Description of Key Rating Drivers/Rating sensitivities:

BWR has essentially relied upon the audited financial results of the company upto FY17, publicly available information and information/clarifications provided by the management.

The rating continues to draw strength from the experienced management and consistent revenue growth. The rating remains constrained by the modest scale of operations, low net worth, customer concentration risk and susceptibility of profitability to fluctuations in input material prices.

Going forward, the ability of the company to improve its scale of operations, complete its ongoing project as envisaged, strengthen its credit profile and manage its working capital efficiently would be the key rating sensitivities.

Rating Outlook: Stable

BWR believes **AKE Infrastructure Pvt Ltd's** business risk profile will be maintained over the medium term. The 'Stable' outlook indicates a low likelihood of rating change over the medium term. The rating outlook may be revised to 'Positive' in case the revenues and profit show sustained improvement. The rating outlook may be revised to 'Negative' if the revenues go down and profit margins show lower than expected figures.

Key Risk drivers

Credit Strengths:

- **Experienced management** : The management has over two decades of experience in the engineering sector and the company has established relationships with its clients and suppliers.
- **Consistent performance** : The company has shown consistent performance in terms of its revenue growth over the last 3 years and improved profitability.
- **Healthy debt protection metrics** : Debt protection metrics are comfortable as indicated by Interest Service coverage Ratio (ISCR) of 7.84 times and Debt Service coverage ratio (DSCR) of 2.96 times for FY 17.

Credit Weaknesses :

- **Modest scale of operations** : The scale of operations are moderate marked by total operating income (TOI) of Rs. 43.16 crs during FY17 as against total operating income of Rs. 29.44 crs in FY16.
- **Project execution risk** : The capacity expansion project is underway and around 50% of construction is completed. The project was initially estimated to be completed in March 2018 and is now expected to be implemented by June 2018. The execution of the project as proposed is key for further growth.
- **High Customer concentration risk** : Majority of orders are from Ajax Fiori Engineering (I) Pvt Ltd, which contributes around 94% of AKEIPL's total sales. Hence there is significant customer concentration risk.
