Financial Performance:

The Company’s overall turnover has witnessed a growth in revenues for FY11 and FY12 mainly due to increased sales. The operating profit has slightly increased from 2.06% in FY11 to 2.20% in FY12. The net profits have decreased from 0.80% in FY11 to 0.68% in FY12.

The long term debt to net worth ratio of the Company has slightly increased from 0.75 in FY11 to 0.78 in FY12. This ratio is expected to further increase in FY13, primarily due to new term loans being taken by the company. The net worth of the Company has seen an increase partly due to infusion of fresh equity and plough back of profits for FY12. The Company has good Return of Capital Employed (RoCE) at 24.74% for FY12.

The Company has provided a provisional turnover of ₹66.67 Crores for FY13.

Rating Outlook:

The ability of the Company to meet its sales projections while improving its profitability margins in a weak macroeconomic scenario holds the key for the Company’s future performance. AAPL’s ability to strengthen the capital structure and increase the scale of operations is the other rating sensitivity.
