### **Rationale / Description of Key rating drivers / Rating Sensitivities:**

BWR has essentially relied upon the draft term sheet outlining the structure of the NCD, audited financial results upto FY17 and provisional financials of FY18 of the issuer - Adani Rail Infra Pvt. Ltd. (ARIPL), audited financial results of FY17 and FY18, 1QFY19 financials of APSEZ and ATL whose equity shares are provided as security, and information and clarifications provided by the issuer.

The rating factors, *inter alia*, the strength of underlying security in the form of pledge of listed equity shares of APSEZ and ATL, structure of the NCD, resourcefulness of the promoters of the Company, and financial flexibility of the group.

However, the rating is constrained by moderate fundamentals of the issuer, reliance on promoter funds, refinance or, alternatively, liquidation of the securities - to meet the payment obligations arising from the NCD, market volatility in the price of equity shares of APSEZ and ATL, and the overall high debt levels of the Adani Group.

### **Structure of the NCD – Rs.1000 Cr:**

The Company has proposed to raise NCDs of Rs.1000 Cr maturing in April 2023. These are zero coupon NCDs and are secured 2.0x by the pledge of equity shares of APSEZ and ATL.

It will require a top-up if the cover falls below 1.70 times on any business day. The Company is required to deposit all amounts payable under the facility (including principal and interest) 15 days prior to maturity. This addresses the liquidity aspects to an extent, should there be a need to invoke the sale of collateral. Other covenants are standard terms that are common for issues of this nature.

As per the draft term sheet, the company is expected to utilize the proceeds of the NCDs towards refinancing of debt, towards capex / opex of the issuer, investment in equity of group companies, onward lending to group companies and for general corporate purpose.
