The Ratings<sup>1</sup> assigned to the bank facilities of *Aditya Auto Engineering Private Limited* (AAE) are primarily constrained by its modest scale of operations, leveraged capital structure and stretched working capital cycle. The ratings are further constrained by fluctuation in raw material prices, supplier and customer concentration risk, intra-group transactions, cyclicity in the automobile industry and high degree of competition in the line of activity due to its fragmented nature.

The ratings continues to draw strength from satisfactory track record of AAE and experience of its promoters, strong technical tie-ups with reputed truck majors, expanding user segments and improving financial position.
