Rationale/Description of Key Rating Drivers/Rating sensitivities:

BWR has essentially relied upon audited financial of FY17, projected financial statements up to FY19, publicly available information and information provided by the bank/management.

The assigned rating factors the experience of the promoters in the business, location advantage of the unit being in the proximity of potato cultivation area and the project having been executed as per the estimates. The rating is, however, constrained by the low scale of operations and revenues and margins being vulnerable to the inherent risks associated with agro commodities

Key Rating Drivers:

The promoters have an extensive experience of the business and have established relations with the farmers and agro traders.

Locational advantage of being established in a traditional potato growing area; though the facilities can also be utilized to store most of the agro commodities

The project, though small, was executed without any time or cost overrun. The stipulations of the lenders regarding capital have been met. Revenues during FY17 at Rs.2.46 Crs are marginally lower than the estimates of Rs.2.62 Crs. Profitability with NPM at 7.39% and debt service ratios with DSCR at 1.50 and ISCR at 2.68 are considered satisfactory. The unit is eligible for a Government subsidy of Rs.2.50 Crs.

Revenues and margins of the unit remain vulnerable to the inherent risks associated with agro commodities, in particular to the crop harvest in areas nearby the unit. Transport costs are considered to play a major role in a trader/farmer to decide on the facility to store the agro produce.

Analytical Approach (Wherever applicable):

Ratings have been based on the undernoted hyperlinked rating criteria.

Rating Outlook: Stable

BWR believes Anmol Cold Storage's business risk profile will be maintained over the medium term. The 'Stable' outlook indicates a low likelihood of rating change over the medium term. The rating outlook may be revised to 'Positive' in case the revenues and profitability show substantial improvement. The rating outlook may be revised to 'Negative' if the revenues and profit margins show lower than expected figures or there is deterioration in the financial risk profile.
