RATING RATIONALE

The Tourism-Homestay rating assigned for The Wood Pecker Homestay positively factors the nearby tourist attractions and the moderate facilities offered. However, the rating is constrained by the inadequate fire safety and security measures, inherent seasonality risk associated with the homestay industry and competition from other homestays in the vicinity.

The Wood Pecker Homestay's ability to cater to the requirements of guests by offering services of good quality with emphasis on guest comfort and security thereby providing value for money stay options would be the key rating sensitivities. Adoption of fire safety measures, first aid kit, fire extinguisher and ensuring better services for differently abled guests with special needs is necessary.

METHODOLOGY ADOPTED

In addition, BWR has drawn up several qualitative and quantitative parameters, based on its own research and in consultation with various experts in this field and in the “user industries”, to make a comprehensive assessment of the quality of Tourism Products/Services. The DoT parameters constitute 80% weightage of the Rating while BWR parameters constitute 20% weightage. The rating is carried out on a scale of A to E with (+) or (-) modifiers for A through C except D and E, to reflect comparative standing within the category. Rating Parameters are broadly categorized as Infrastructure, Services, Safety and Security, Statutory Compliances, Good Design Practices, Evaluation of business model, Promoters/Management analysis, Location analysis, Scale, diversification and coverage, Brand strength and Networking and Developmental efforts.
